

Bhavani Asish Bokka

9014508853 — asish.bhavani@email.com — LinkedIn — GitHub

Summary

Software Developer with foundational knowledge of Java, Python, and SQL and basic exposure to backend development and REST API design. Familiar with FastAPI, Git/GitHub, and Linux environments. Demonstrates strong problem-solving skills and a continuous learning mindset to contribute effectively in a Java/Python developer role.

Experience

Software Engineer, ICICI Bank

Apr 2022 – Present

- Managed enterprise client accounts while supporting digital banking platforms and internal software systems.
- Analyzed customer transaction data using SQL, Excel, and reporting tools to identify service improvements and operational insights.
- Collaborated with technology and product teams to resolve system issues and improve digital workflows.
- Worked with structured datasets and system-based processes to ensure data accuracy and efficient issue resolution.

Projects

E-Commerce Web Application

HTML, CSS, JavaScript, Java

- Developed a full-stack e-commerce web application enabling users to browse products, manage carts, and place orders.
- Designed responsive user interfaces using HTML, CSS, and JavaScript to enhance user experience across devices.
- Implemented backend functionality using Java to handle product management, order processing, and user authentication.
- Integrated frontend and backend components to enable seamless data flow between the user interface and server-side logic.
- Structured and managed product and transaction data to ensure accurate order handling and system reliability.

Pneumonia Detection Using Chest X-Ray

Python, Deep Learning

- Implemented Python-based data preprocessing and model evaluation workflow.
- Built and trained a convolutional neural network (CNN) model to detect pneumonia from chest X-ray images.
- Performed dataset preprocessing, model training, and accuracy evaluation using TensorFlow/Keras.

Fake News Detection System

Machine Learning, FAST API

- Exposed the trained model through basic REST APIs using FastAPI for prediction.
- Structured backend logic into reusable Python functions and maintained the code using Git and GitHub.

ML-Powered Assistive Technology

Python, Streamlit

- Developed Python-based backend logic for multi-modal data preprocessing and analysis.
- Integrated a Streamlit-based interface for real-time user interaction.
- Focused on clean, modular Python code and structured workflow for maintainability.
- Published in ICONSTEAM Conference Proceedings, indexed in IEEE Xplore.

Technical Skills

Programming Languages:Python, Java, JavaScript

Backend & APIs: FastAPI , RESTful APIs,MySQL

Web Technologies: HTML, CSS, Bootstrap

Version Control: Git, GitHub

Soft Skills: Communication, Problem Solving, Analytical Thinking, Teamwork

Education

Sathyabama Institute of Science and Technology <i>B.E. in Computer Science and Engineering, CGPA: 8.3</i>	2020 – 2024 Chennai
Tirumala Junior College <i>Intermediate, GPA: 9.3</i>	2018 – 2020 Rajahmundry
Sasi English Medium School <i>Class X, GPA: 9.5</i>	2017 – 2018 Rajahmundry

Certifications

Certified in HTML and CSS – Focused on responsive web design and layouts.

Certified in Java Full Stack Development – Core Java, SQL, MySQL, HTML, CSS, JavaScript.

Hands-on experience in Python backend development (FastAPI, REST APIs) through academic and self-driven projects

Publications

Designed an ML-powered assistive technology for individuals with cognitive and mental disabilities.

Implemented multi-modal emotion analysis using machine learning techniques.

Focused on accessibility, inclusivity, and ethical AI principles.

Published in ICONSTEAM Conference Proceedings, indexed in IEEE Xplore.
